## REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Abelow U.S. Pat. No. 5,999,908 discloses a product or service that contains a microprocessor and a facility for communication.

Yano, Ayumi JP02001265405A discloses a multiple system servo actuator controller capable of preventing the deterioration of responsiveness or servo rigidity as much as possible and preventing power waste.

However, neither Abelow nor Yano singularly or in combination discloses the recited feature:

As per claims 1, 4, 7 and 13 " an electrical conductor for transmitting voltage and accumulating charge, referred to as a market, the price information being represented on the marketwire by analog fluctuations in an electrical characteristic of the marketwire, the price information being dependent on the applied force produced by each actuator on the structure, the marketwire being connected to each actuator controller to convey the price information to the actuator controllers without requiring any one of the actuators to communicate directly with any other one of the actuators".

## **Conclusion**

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The examiner can normally be reached on 6:30 to 5:00.
